(54) 【考案の名称】 人物史本

(57) 【要約】

【課題】 自分史本製作者にとって、質問事項に対して、記憶の回復が容易にでき、文章力をさほど必要とせず、質問事項に回答することができ、それによって、優れた内容の人物史本を簡単に作成することの可能な人物史本を提供するを提供する。

【解決手段】 時代項目別に順次綴られた複数の人物史用ページシートからなる人物史本であって、複数の人物史用ページシートが、時代項目別に、人物固有情報についての予め設定されたアンケート形式の質問事項に対する回答記入欄が設けられるとともに、回答記入欄の少なくとも一部に、予め設定された回答例が記載された選択式の回答欄が設けられてなる人物史用ページシートを有する。

(2)

実用新案登録第3069161号

【実用新案登録請求の範囲】

【請求項1】 時代項目別に順次綴られた複数の人物史用ページシートからなる人物史本であって、前記複数の人物史用ページシートが、

前記時代項目別に、人物固有情報についての予め設定されたアンケート形式の質問事項に対する回答記入欄が設けられるとともに、

前記回答記入欄の少なくとも一部に、予め設定された回答例が記載された選択式の回答欄が設けられてなる人物史用ページシートを有することを特徴とする人物史本。

【請求項2】 前記選択式の回答欄が、複数の回答例から選択する方式を有することを特徴とする請求項1に記載の人物史本。

【請求項3】 前記選択式の回答欄が、複数の回答例からマークシート方式で選択するマークチェック欄を有することを特徴とする請求項2に記載の人物史本。

【請求項4】 前記選択式の回答欄が、空欄に記入することによって、予め設定された回答例となるような選択記入式の回答例を有することを特徴とする請求項1から3に記載の人物史本。

【請求項5】 時代項目別に順次綴られた複数の人物史用ページシートからなる人物史本であって、前記複数の人物史用ページシートが、

前記時代項目に対応した社会的情勢がその発生年と対になった年表形式でまとめられた社会情勢項目欄を有し、前記社会情勢項目に対応した人物固有情報を記載する人物情報記載用空欄を有する人物史用ページシートを有することを特徴とする人物史本。

【請求項6】 前記人物情報記載用空欄が、前記社会情勢項目を選択して、それに対応する人物固有情報を記載するように構成されていることを特徴とする請求項5に記載の人物史本。

【請求項7】 前記選択した社会情勢項目を特定するための特定欄を有することを特徴とする請求項6に記載の人物史本。

【請求項8】 時代項目別に順次綴られた複数の人物史用ページシートからなる人物史本であって、前記複数の人物史用ページシートが、前記時代項目別に、人物固有情報についての予め設定されたアンケート形式の質問事項に対する回答記入欄が設

けられるとともに、

前記回答記入欄の少なくとも一部に、予め設定された回答例が記載された選択式の回答欄が設けられてなる人物史用ページシートを有するとともに、

前記複数の人物史用ページシートが、前記時代項目に対応した社会的情勢がその発生年と対になった年表形式でまとめられた社会情勢項目欄を有し、前記社会情勢項目に対応した人物固有情報を記載する人物情報記載用空欄を有する人物史用ページシートを有することを特徴とする人物史本。

【考案の詳細な説明】

【0001】

【考案の属する技術分野】

本考案は、特定の人物の履歴について説明する人物史本に関する。

【0002】

【従来の技術】

近年において、年配の人を中心に自己の生い立ちおよび当時の歴史的背景等を記した自己の人物史本、いわゆる自分史本の製作が広く行われている。

自分史本の製作には、主に製作者（本人）の幼少時代から現在に至るまでの個人的ならびに社会的出来事に関する明確な記憶およびそれを補完する資料、加えてそれら膨大な情報を整理し、読物として伝達・表現するための文章力および構成力が要求される。

【0003】

一方で、原稿作成の負担を軽減するための書込式の簡易な自分史本も存在する。この自分史本は、例えば、出生、小学生時代等の項目からなり、また各項目においては複数の質問事項が設けられ、これらの質問事項に本人が回答することによって、自分史本を完成するようになっている。

しかしながら、質問事項が大まかであることが多く、質問事項に対して、本人である原稿作成者が、各時代における自己の記憶をもとに回答を自ら文章化するなどして作成しなければならず、非常に根気と手間のいる作業であり、文章力によってその人物史の内容が左右されてしまうことにもなる。しかも、質問事項が大まかであるため、本人の記憶を回復するとは言いがたく、全ての質問事項に回答して、自分史本を完成することは極めて困難であった。

【0004】

本考案の目的は、上述した実情に鑑み、自分史本製作者にとって、質問事項に対して、記憶の回復が容易にでき、文章力をさほど必要とせずに、質問事項に回答することができ、それによって、優れた内容の人物史本を簡単に作成することの可能な人物史本を提供することを目的としている。

【0005】

(6)

実用新案登録第3069161号

【課題を解決するための手段】

本考案は、上述した従来技術の課題および目的を達成するために考案されたものであって、本考案の人物史本は、人物史本時代項目別に順次綴られた複数の人物史用ページシートからなる人物史本であって、

前記複数の人物史用ページシートが、

前記時代項目別に、人物固有情報についての予め設定されたアンケート形式の質問事項に対する回答記入欄が設けられるとともに、

前記回答記入欄の少なくとも一部に、予め設定された回答例が記載された選択式の回答欄が設けられてなる人物史用ページシートを有することを特徴とする。

【0006】

このように、予め設定されたアンケート式の質問事項に対する回答欄に、予め設定された選択式の回答欄が設けられているので、この選択式の回答欄により記憶を回復することができるとともに、選択式の回答欄に回答するだけで、特別な文章能力を必要とせず、一定レベルでしかも優れた内容の自己の人物史本、すなわち自分史本を簡単に作成することが可能である。

【0007】

また、本考案の人物史本は、前記選択式の回答欄が、複数の回答例から選択する方式を有することを特徴とする。

これによって、質問事項に対して、複数の回答例から選択できるので、回答の幅が広がり、人物史特定の上からも優れた内容とすることが可能となる。

さらに、本考案の人物史本は、前記選択式の回答欄が、複数の回答例からマークシート方式で選択するマークチェック欄を有することを特徴とする。

【0008】

このように構成することによって、複数の回答例からマークチェック欄をチェックして、マークシート方式で選択するだけで良いので、質問事項に対する回答が極めて容易であり、人物史本を簡単に作成することが可能となる。

また、本考案の人物史本は、前記選択式の回答欄が、空欄に記入することによって、予め設定された回答例となるような選択記入式の回答例を有することを特徴とする。

(7)

実用新案登録第3069161号

【0009】

これにより、空欄に台紙、日付などを記入するだけでよいので、質問事項に対する回答が極めて容易となり、しかも、予め設定された回答例となるとともに、個別の回答例となるので、独自の人物史本を簡単に作成することが可能となる。

また、本考案の人物史本は、時代項目別に順次綴られた複数の人物史用ページシートからなる人物史本であって、

前記複数の人物史用ページシートが、

前記時代項目に対応した社会的情勢がその発生年と対になった年表形式でまとめられた社会情勢項目欄を有し、前記社会情勢項目に対応した人物固有情報を記載する人物情報記載用空欄を有する人物史用ページシートを有することを特徴とする。

【0010】

このように、年表形式でまとめられた社会情勢項目欄に対応して、その発生年に対応して、その年月での記憶を復元することができ、その時期に応じた人物固有情報を記載することができるので、確かなしかも時代に応じた人物史情報を記載することができる。

さらに、本考案の人物史本は、前記人物情報記載用空欄が、前記社会情勢項目を選択して、それに対応する人物固有情報を記載するように構成されていることを特徴とする。

【0011】

これにより、社会情勢項目に応じて、人物固有情報を記載できるので、さらにいっそうその年月での記憶を復元することができ、その時期に応じた人物固有情報を記載することができるので、確かなしかも時代に応じた人物史情報を記載することができる。

また、本考案の人物史本は、前記選択した社会情勢項目を特定するための特定欄を有することを特徴とする。

【0012】

これにより、複数の社会情勢項目から特定欄をチェックするなどして特定して選択し、これに応じて、その時期に応じた人物固有情報を記載することができる

(B)

実用新案登録第3069161号

ので、確かなしかも時代に応じた人物史情報を記載することができる。

さらに、本考案の人物史本は、時代項目別に順次綴られた複数の人物史用ページシートからなる人物史本であって、

前記複数の人物史用ページシートが、

前記時代項目別に、人物固有情報についての予め設定されたアンケート形式の質問事項に対する回答記入欄が設けられるとともに、

前記回答記入欄の少なくとも一部に、予め設定された回答例が記載された選択式の回答欄が設けられてなる人物史用ページシートを有するとともに、

前記複数の人物史用ページシートが、

前記時代項目に対応した社会的情勢がその発生年と対になった年表形式でまとめられた社会情勢項目欄を有し、前記社会情勢項目に対応した人物固有情報を記載する人物情報記載用空欄を有する人物史用ページシートを有することを特徴とする。

【0013】

このように、上記に説明した両方の特徴を有するので、極めて優れた内容の自己の人物史本、すなわち自分史本を簡単に作成することが可能となる。

【0014】

【考案の実施の形態】

以下、本考案の実施の形態（実施例）について添付図面に基づき詳細に説明する。

図1は、本考案の人物史本の斜視図、図2は、図1の人物史本の人物史用ページシートの一実施例を示す図である。

【0015】

図1において、10は、特定の人物（以下「ユーザ」と言う）に関する歴史本（以下、「人物史本」という）を示している。人物史本10は、時代項目別に順次綴られた複数の人物史用ページシート12（以下、「ページシート」と言う）が装填されて一冊の冊子を構成している。

このページシート12は、図2に示したように、例えば、「出生～幼年時代」「小学生時代／友人と遊び」等の各年代の時代項目を記載した時代項目欄14が

(8)

実用新案登録第3089161号

その上部に形成されている。さらに、この時代項目欄14に記載された時代項目に応じて、予め設定された複数の質問事項が記載された質問事項欄16、16が設けられている。

【0016】

そして、この質問事項欄16に記載された質問事項は、予め設定されたアンケート形式の質問事項となっており、質問事項欄16には、これら質問事項に対する回答記入欄18が各質問事項に対して設けられている。

具体的には、例えば、「出生～幼年時代」「小学生時代／友人と遊び」の項においては、生年月日、出生地、両親の名前、出生時の家族構成、出生時の体重、友人との遊びなどの細かな質問について、ユーザは記憶の許す範囲で回答していくことになる。

【0017】

また、これら回答記入欄18の少なくとも一部には、質問事項欄16に記載された質問事項に応じて、予め設定された回答例が記載された選択式の回答欄20が設けられている。

このような回答欄20として、例えば、YES／NO形式（はい・いいえ）の回答例、複数の選択肢22を用意しておいてユーザがこの選択肢から該当するものを選択するような回答例がある。

【0018】

ここで、例えば、ユーザ自身の明確な記憶に基づいた回答が求められる質問、例えば、友人との遊び、入学式の情景、通学路の風景などに対しては、ユーザの記憶復元を容易にするために、さまざまな選択肢22が用意されており、ユーザは該当する選択肢を選ぶようになっている。

このようにすることで、遠い過去の断片的な情報であっても、これらの選択肢により復元された記憶に基づいて、回答することができるようになっている。

【0019】

例えば、図2に示したように、複数の選択肢22としては、「友人との遊び（女子）：室内」について、「おはじき」、「あやとり」、「お手玉」、「お絵描き」、「お人形さんごっこ」などといった選択肢の中で、ユーザに該当する選択

(10)

実用新案登録第3069161号

肢を選択させるようになっている。

図2の実施例では、このような回答欄20として、複数の選択肢22が記載された例を示している。そして、これらの選択肢22を選択する方式として、複数の回答例からマークシート方式で選択するために、選択肢22の前に矩形状のマークチェック欄24が設けられている。

【0020】

この場合には、複数の選択肢22から該当する選択肢を選択して、選択された選択肢22に応じてマークチェック欄24をチェックして、マークシート方式で選択するだけで、回答が得られるので、質問事項に対して回答するのが極めて容易となり、その結果、人物史本を簡単に作成することが可能となる。

なお、このようにマークチェック欄24を設ける代わりに、例えば、回答例自体を丸印で囲んで選択するようにすることも勿論可能である。

【0021】

また、図3は、このような回答欄20の別の実施例として、空欄26が設けられた例を示している。この実施例では、空欄26が括弧にて形成されており、この空欄26に、言葉、日付などの個人情報を記載すれば、一つの個人情報、または一文の文章となるようになっている。例えば、図3に示した実施例では、質問事項欄16の「帰郷したときの自宅や周囲の状況」に対応して、回答例をマークチェック欄24をチェックして、マークシート方式で選択するとともに、空欄26に例えば、「兄」などの情報を記載することによって、予め設定された回答例、この実施例では、『帰郷してから空襲にあい、家族（兄）を失った。』となるようになっている。

【0022】

このように、空欄に言葉、日付などを記入するだけで回答を作成することができるので、質問事項に対する回答が極めて容易となり、しかも、予め設定された一定レベルの回答例となるとともに、個人に応じた個別の回答例となるので、独自の人物史本を簡単に作成することが可能となる。

図4は、ページシート12の別の実施例を示しており、このページシート12では、従来のように、質問事項欄16には、これら質問事項に対する回答記入欄

(11)

実用新案登録第3069161号

18として空欄28のみが設けられている。すなわち、本考案の人物史本10には、従来タイプのページシート12が含まれていてもよい。

【0023】

図5は、ページシート12の別の実施例を示しており、このページシート12では、図2～図4の実施例のページシート12を組み合わせたタイプのページシート12となっている。

すなわち、質問事項欄16に対応した回答欄20が、図2の実施例のように、複数の選択肢22とマークチェック欄24が設けられ、図3の実施例のように、一つの個人情報、または一文の文章となるように一文の文章となるように空欄26が設けられるとともに、図4の実施例のように、空欄28のみが設けられている。

【0024】

図6は、ページシート12のさらに別の実施例を示しており、このページシート12では、時代項目欄14に応じて、社会情勢項目欄30が設けられている。この社会情勢項目欄30には、その発生年32とこれと対になった社会的出来事34が年表形式でまとめられている。なお、この発生年32の前には、例えば、数字、アルファベットなどでその社会的出来事34を特定する社会的出来事特定欄36が形成されている。

【0025】

このような社会的出来事34は、時代項目欄14で特定された時代項目に応じた、その時代における代表的な事件、流行、人物などが挙げられる。

そして、この社会情勢項目欄30の下方には、社会情勢項目に対応した人物固有情報を記載する人物情報記載用空欄38が設けられている。この人物情報記載用空欄38には、社会情勢項目欄30に記載された社会的出来事34の中から、ユーザが特に印象に残っているものを選択して、この選択した社会的出来事34を特定するための、例えば、社会的出来事特定欄36に記載されている数字、アルファベットなどを記載して特定する矩形状の特定欄40が形成されている。

【0026】

また、人物情報記載用空欄38には、特定欄40で特定した社会的出来事34

(12)

実用新案登録第3069161号

に応じて、ユーザが経験した各出来事または時代と関連する社会的出来事に関し
て、個人情報に記載する空欄24が設けられている。

なお、この場合、空欄24を設ける代わりに、上述した実施例のように、例え
ば、各年代における歴史的背景、例えば事件や出来事、流行などについて記憶の
あるものについて、そのキーワードを回答するような質問が設けられていても良
い。このような、キーワードとしては、例えば人名、事件名、流行語等が挙げら
れる。キーワードを回答させるに際しては、ユーザにキーワードを直接記入させ
てもよいが、各時代でのキーワードによる選択肢を予め用意しておいてこの選択
肢を選択させてもよい。

【0027】

これにより、不鮮明な記憶または断片的な記憶に頼らざるを得ないときであつて
も、ユーザはこのキーワードによって、従来において添付されたような膨大な資
料に目を通さずに、断片的な社会的情報に関する記憶を復元し回答することがで
きる。

このように、本考案の人物史本では、上述した種々のページシート12を適宜
選択して、綴って人物史本を作成すればよい。

【0028】

以上、本考案の実施例について説明したが、本考案は、上述した実施例に限定
されるものではない。例えば、図1の実施例では、製本された状態を示している
が、例えば、バインダー形式で複数のページシート12を脱着自在に綴って一冊
の冊子を構成するようしても良いことは勿論である。

また、図2～図6の実施例を適宜組み合わせることによって、例えば、社会的
出来事と個人の時代を予め、ユーザの年代に併せて設定しておくなど、種々のペ
ージシート12を作成することも勿論可能である。

【0029】

さらに、このようにユーザが個人情報を記載した人物史本を原稿用として用い
、これから個人情報を抽出して、正式な文章化された人物資本を製作することも
勿論可能である。

【0030】

(13)

実用新案登録第3069161号

【考案の効果】

以上説明したように、本考案に係る人物史本によれば、予め設定されたアンケート式の質問事項に対する回答欄に、予め設定された選択式の回答欄が設けられているので、この選択式の回答欄により記憶を回復することができるとともに、選択式の回答欄に回答するだけで、特別な文章能力を必要とせず、一定レベルでしかも優れた内容の自己の人物史本、すなわち自分史本を簡単に作成することが可能である。

【0031】

また、本考案に係る人物史本によれば、年表形式でまとめられた社会情勢項目欄に対応して、その発生年に対応して、その年月での記憶を復元することができ、その時期に応じた人物固有情報を記載することができるので、確かなしかも時代に応じた人物史情報を記載することができる。

CLAIMS

[Utility-model registration claim]

[Claim 1] It is the history book of a person which consists of two or more page sheets for the histories of a person spelled one by one by the age item. While the reply block to the question matter of the questionnaire format that two or more aforementioned page sheets for the histories of a person were beforehand set up by the aforementioned age item about the person peculiar information is prepared The history book of a person characterized by having the page sheet for the histories of a person with which it comes to prepare the reply card column of the case index the example answer to which the aforementioned reply block was set beforehand in part at least was indicated to be.

[Claim 2] The history book according to claim 1 of a person characterized by having the method which the reply card column of the aforementioned case index chooses from two or more example answers.

[Claim 3] The history book according to claim 2 of a person characterized by having the mark check card column which the reply card column of the aforementioned case index chooses from two or more example answers by the answer sheet exam.

[Claim 4] The history book given in the claims 1-3 characterized by having the example answer of a selection posting formula which serves as the example answer to which the reply card column of the aforementioned case index was beforehand set by filling in a blank of a person.

[Claim 5] It is the history book of a person which consists of two or more page sheets for the histories of a person spelled one by one by the age item. It has the situation item card column of society into which two or more aforementioned page sheets for the histories of a person were packed in the chronology format from which the social situation corresponding to the aforementioned age item became the occurrence year and pair. The history book of a person characterized by having the page sheet for the histories of a person which has the blank for a person information publication which indicates the person peculiar information corresponding to the aforementioned situation item of society.

[Claim 6] The history book according to claim 5 of a person characterized by for the aforementioned blank for a person information publication choosing the aforementioned situation item of society, and constituting it so that the person peculiar information corresponding to it may be indicated.

[Claim 7] The history book according to claim 6 of a person characterized by having a specific card column for specifying the situation item of society which carried out [aforementioned] selection.

[Claim 8] It is the history book of a person which consists of two or more page sheets for the histories of a person spelled one by one by the age item. While the reply block to the question matter of the questionnaire format that two or more aforementioned page sheets for the histories of a person were beforehand set up by the aforementioned age item about the person peculiar information is prepared As if it has the page sheet for the histories of a person with which it comes to prepare the reply card column of the case index the example answer to which the aforementioned reply block was set beforehand in part at least was indicated to be, both It has the situation item card column of society into which two or more aforementioned page sheets for the histories of a person were packed in the chronology format from which the social situation corresponding to the aforementioned age item became the occurrence

year and pair. The history book of a person characterized by having the page sheet for the histories of a person which has the blank for a person information publication which indicates the person peculiar information corresponding to the aforementioned situation item of society.

DETAILED DESCRIPTION

[A detailed explanation of a design]

[0001]

[The technical field to which a design belongs]

This design is related with the history book of a person explaining a specific person's history.

[0002]

[Description of the Prior Art]

In recent years, the manufacture of the history book of a person of self in which personal history of self, the historical background of those days, etc. were described focusing on the elderly man, and the so-called history book of itself is performed widely.

The text force and configuration force individual and the data which complement the clear storage and clear it about a social occurrence, and for arranging these huge informations in addition, and transmitting and expressing as books and magazines are required of a manufacture of the history book of themselves until it mainly results now from a manufacturer's (him) childhood age.

[0003]

On the other hand, the simple history book of itself of the write-in formula for mitigating the burden of a manuscript creation also exists. It consists of items, such as birth and a schoolchild age, and two or more question matters are established in each item, and this history book of itself completes the history book of itself, when he replies to these question matters.

However, it is common for a question matter to be rough, and it is the work which text-izing a reply himself etc. must carry out to a question matter on the basis of storage of in each age in the manuscript implementor who is him of self, must create, and requires perseverance and time very much, and the content of the history of a person is also will be influenced by the text force. And since the question matter was rough, it was very difficult to be hard to say that his storage is recovered, to reply to all question matters, and to complete the history book of oneself.

[0004]

In view of the actual condition mentioned above, the purpose of this design can perform recovery of storage easily to a question matter for the history book manufacturer of itself, can be answered to a question matter, without needing the text force so much, and aims at offering the possible history book of a person of creating simply the history book of a person of the content which was excellent with it.

[0005]

[Means for Solving the Problem]

It is devised in order that this design may attain the technical problem and the purpose of the conventional technique which were mentioned above. the history book of a person of this design It is the history book of a person which consists of two or more page sheets for the histories of a person spelled one by one by the history book age item of a person. The page sheet for the histories of a person of the aforementioned plurality While the reply block to the question matter of the questionnaire format beforehand set up by the aforementioned age item about the person peculiar information is prepared It is

characterized by having the page sheet for the histories of a person with which it comes to prepare the reply card column of the case index the example answer to which the aforementioned reply block was set beforehand in part at least was indicated to be.

[0006]

Thus, since the reply card column of the case index beforehand set as the reply card column to the question matter of the questionnaire formula set up beforehand is prepared, while storage is recoverable with the reply card column of this case index, it is possible to create simply, the history book of a person, i.e., the history book of itself, of self of the content which only replied to the reply card column of a case index, and did not need special text capacity, but was moreover excellent in fixed level.

[0007]

Moreover, the history book of a person of this design is characterized by having the method which the reply card column of the aforementioned case index chooses from two or more example answers. Since it can choose from two or more example answers to a question matter by this, the width of face of a reply spreads and it is enabled to consider as the content which was excellent also from the history specialization of a person.

Furthermore, the history book of a person of this design is characterized by having the mark check card column which the reply card column of the aforementioned case index chooses from two or more example answers by the answer sheet exam.

[0008]

Thus, since what is necessary is just to check a mark check card column from two or more example answers, and to choose by the answer sheet exam by constituting, the reply to a question matter is very easy, and becomes possible [creating the history book of a person simply].

Moreover, the history book of a person of this design is characterized by the reply card column of the aforementioned case index having the example answer of a selection posting formula which serves as the example answer beforehand set up by filling in a blank.

[0009]

Since it becomes an individual example answer while the reply to a question matter becomes very easy and moreover serves as the example answer set up beforehand by this, since what is necessary is just to enter language, a date, etc. in a blank, it is enabled to create the original history book of a person simply. Moreover, the history book of a person of this design is a history book of a person which consists of two or more page sheets for the histories of a person spelled one by one by the age item. The page sheet for the histories of a person of the aforementioned plurality It has the situation item card column of society collected in the chronology format from which the social situation corresponding to the aforementioned age item became the occurrence year and pair. It is characterized by having the page sheet for the histories of a person which has the blank for a person information publication which indicates the person peculiar information corresponding to the aforementioned situation item of society.

[0010]

Thus, since storage by the years can be restored and the person peculiar information according to the stage can be indicated corresponding to the occurrence year corresponding to the situation item card column of society collected in the chronology format, the clear history information of the person moreover corresponding to the age can be indicated.

Furthermore, the history book of a person of this design is characterized by constituting the aforementioned blank for a person information publication so that the aforementioned situation item of society may be chosen and the person peculiar information corresponding to it may be indicated.

[0011]

Since storage by the years can be restored further much more since a person peculiar information can be indicated according to the situation item of society, and the person peculiar information according to the stage can be indicated by this, the clear history information of the person moreover corresponding to the age can be indicated.

Moreover, the history book of a person of this design is characterized by having a specific card column

for specifying the situation item of society which carried out [aforementioned] selection.

[0012]

Since it can carry out checking a specific card column etc., it can specify and choose it from two or more situation items of society by this and the person peculiar information according to the stage can be indicated according to this, the clear history information of the person moreover corresponding to the age can be indicated.

Furthermore, the history book of a person of this design is a history book of a person which consists of two or more page sheets for the histories of a person spelled one by one by the age item. The page sheet for the histories of a person of the aforementioned plurality While the reply block to the question matter of the questionnaire format beforehand set up by the aforementioned age item about the person peculiar information is prepared As if it has the page sheet for the histories of a person with which it comes to prepare the reply card column of the case index the example answer to which the aforementioned reply block was set beforehand in part at least was indicated to be, both The page sheet for the histories of a person of the aforementioned plurality It has the situation item card column of society collected in the chronology format from which the social situation corresponding to the aforementioned age item became the occurrence year and pair. It is characterized by having the page sheet for the histories of a person which has the blank for a person information publication which indicates the person peculiar information corresponding to the aforementioned situation item of society.

[0013]

Thus, since it has the characteristic feature of both which were explained above, it is enabled to create simply, the history book of a person, i.e., the history book of itself, of self of the extremely excellent content.

[0014]

[Gestalt of implementation of a design]

Hereafter, the gestalt (example) of operation of this design is explained in detail based on an accompanying drawing.

It is drawing in which drawing's 1 showing the perspective diagram of the history book of a person of this design, and showing [2] one example of the page sheet for the histories of a person of the history book of a person of drawing 1.

[0015]

In drawing 1, 10 shows the history book (henceforth "the history book of a person") about a specific person (henceforth an "user"). The history books 10 of a person are two or more page sheets for the histories of a person 12 (henceforth a "page sheet") spelled one by one by the age item.

It *****s and the booklet of one volume is constituted.

This page sheet 12 is a "birth - **** age", as shown in drawing 2.

The age item card column 14 which indicated the age item of each ages, such as "a schoolchild age / friend, and play", is formed in the upper part. Furthermore, according to the age item indicated by this age item card column 14, the question matter card columns 16 and 16 two or more question matters set up beforehand were indicated to be are formed.

[0016]

And the question matter indicated by this question matter card column 16 is the question matter of the questionnaire format set up beforehand, and the reply block 18 to these questions matter is formed in the question matter card column 16 to each question matter.

Specifically in the term of a "birth - **** age", and "a schoolchild age / friend and play", the user will answer in the domain which storage allows about fine questions, such as a birth date, a places of birth, parents' identifier, a family configuration at the time of birth, the weight at the time of birth, and play with a friend.

[0017]

Moreover, according to the question matter indicated by the question matter card column 16, the reply card column 20 of the case index the example answer set up beforehand was indicated to be is formed in

a part of these replies block [at least] 18.

There is an example answer which chooses that to which the example answer of a YES/NO format (being no [-]) and two or more alternative 22 are prepared for, and an user corresponds from this alternative as such a reply card column 20.

[0018]

In order to make an user's storage restoration easy here to the question asked for the reply based on clear storage of for example, the user itself, for example, the play with a friend, the sight of an entrance ceremony, the scenery of a school zone, etc., various alternative 22 is prepared and an user chooses the corresponding alternative.

By doing in this way, even if it is a fragmentary information on the far past, it can answer based on the storage restored by such alternative.

[0019]

For example, as shown in drawing 2, as two or more alternative 22, the alternative applicable to an user is chosen about "the play (lady):interior of a room with a friend" in the alternative a "crawling", "**** and **", a "beanbag", "painting", "doll coral ****", etc.

The example of drawing 2 shows the example two or more alternative 22 was indicated to be as such a reply card column 20. And in order to choose from two or more example answers by the answer sheet exam as a method which chooses such alternative 22, the rectangle-like mark check card column 24 is formed before alternative 22.

[0020]

In this case, since choose the alternative which corresponds from two or more alternative 22, the mark check card column 24 is checked according to the selected alternative 22, it only chooses by the answer sheet exam and a reply is obtained, answering to a question matter becomes very easy, and, as a result, it becomes possible [creating the history book of a person simply].

In addition, of course, it is also possible to surround for example, the example answer itself by the balloon, and to choose it instead of forming the mark check card column 24 in this way.

[0021]

Moreover, drawing 3 shows the example in which the blank 26 was formed as another example of such a reply card column 20. In this example, if the blank 26 is formed in the parenthesis and indicates personal informations, such as language and a date, in this blank 26, it will become one personal information or the text of one sentence. For example, while the mark check card column 24 is checked and an example answer is chosen by the answer sheet exam in the example shown in drawing 3 corresponding to "the house when coming home and the surrounding status" of the question matter card column 16 the example answer beforehand set up by indicating the information of an "elder brother" etc. in a blank 26, and this example -- " -- after coming home, the air raid was suited, and the family (elder brother) was lost It becomes ".

[0022]

Thus, very becomes easy [the reply to a question matter], since a reply can be created only by entering language, a date, etc. in a blank, and moreover, since it becomes the individual example answer according to the individual while it becomes the example answer of the fixed level set up beforehand, it is enabled to create the original history book of a person simply.

Drawing 4 shows another example of the page sheet 12, and only the blank 28 is formed in the question matter card column 16 as a reply block 18 to these questions matter like before with this page sheet 12. That is, the page sheet 12 of a type may be conventionally contained in the history book 10 of a person of this design.

[0023]

Drawing 5 shows another example of the page sheet 12, and serves as the page sheet 12 of the type which combined the page sheet 12 of the example of drawing 2 - view 4 with this page sheet 12.

That is, like the example of drawing 2 in the reply card column 20 corresponding to the question matter card column 16, two or more alternative 22 and mark check card columns 24 are prepared, and like the

example of drawing 3 , while a blank 26 is formed so that it may become the text of one sentence so that it may become one personal information or the text of one sentence, only the blank 28 is formed like the example of drawing 4 .

[0024]

Drawing 6 shows still another example of the page sheet 12, and the situation item card column 30 of society is formed with this page sheet 12 according to the age item card column 14.

The social occurrence 34 which became the occurrence year 32 and this, and the pair is collected into this situation item card column 30 of society in the chronology format. In addition, before this occurrence year 32, the social occurrence specialization card column 36 which specifies the social occurrence 34 with a number, the alphabet, etc. is formed.

[0025]

The typical incident in the age according to the age item as which such a social occurrence 34 was specified in the age item card column 14, fashion, a person, etc. are mentioned.

And the blank for a person information publication 38 which indicates the person peculiar information corresponding to the situation item of society is formed in the lower part of this situation item card column 30 of society. The specific rectangle-like card column 40 which indicates and specifies a number, the alphabet, etc. as which it is indicated by the social occurrence specialization card column 36 since especially an user chooses what remains in the impression and specifies this selected social occurrence 34 out of the social occurrence 34 indicated by the situation item card column 30 of society is formed in this blank for a person information publication 38.

[0026]

Moreover, according to the social occurrence 34 specified in the specific card column 40, the blank 24 which indicates a personal information is formed in the blank for a person information publication 38 about the social occurrence relevant to each occurrence or age which the user experienced.

In addition, a question which answers the keyword may be prepared like the example mentioned above instead of forming a blank 24 in this case about what has storage about the historical background in each age, for example, an incident and an occurrence, fashion, etc. As such a keyword, a name of a person, an incident name, a vogue word, etc. are mentioned, for example. Although it may face making a keyword answer and an user may be made to fill in a keyword directly, the alternative by the keyword in each age is prepared beforehand, and this alternative may be made to choose.

[0027]

Even if it is the time when it cannot depend on indistinct storage or fragmentary storage by this, by this keyword, without letting scale division pass, an user can restore the storage about a fragmentary social information to huge data which were appended in the former, and can reply to them.

Thus, what is necessary is to choose suitably the various page sheets 12 mentioned above, to spell them, and just to create the history book of a person with the history book of a person of this design.

[0028]

As mentioned above, although the example of this design was explained, this design is not limited to the example mentioned above. For example, although the example of drawing 1 shows the status that a book was bound, of course, you may carry out as [constitute / the booklet of one volume / spell two or more page sheets 12 free / a desorption / in a binder format, and / for example,].

Moreover, of course, it is also possible to create the various page sheets 12, such as to set a social occurrence and an individual age as an user's age collectively beforehand, by combining the example of drawing 2 - view 6 suitably.

[0029]

Furthermore, of course, it is also possible to extract a personal information after this and to manufacture the text-ized formal person capital, using the history book of a person with which the user indicated the personal information in this way as an object for manuscripts.

[0030]

[Effect of the Device]

Since the reply card column of the case index beforehand set as the reply card column to the question matter of the questionnaire formula set up beforehand is prepared according to the history book of a person concerning this design as explained above While storage is recoverable with the reply card column of this case index, it is possible to create simply, the history book of a person, i.e., the history book of itself, of self of the content which only replied to the reply card column of a case index, and did not need special text capacity, but was moreover excellent in fixed level.

[0031]

Moreover, since storage by the years can be restored and the person peculiar information according to the stage can be indicated corresponding to the occurrence year corresponding to the situation item card column of society collected in the chronology format according to the history book of a person concerning this design, the clear history information of the person moreover corresponding to the age can be indicated.

PRIOR ART

[Description of the Prior Art]

In recent years, the manufacture of the history book of a person of self in which personal history of self, the historical background of those days, etc. were described focusing on the elderly man, and the so-called history book of itself is performed widely.

The text force and configuration force individual and the data which complement the clear storage and clear it about a social occurrence, and for arranging these huge informations in addition, and transmitting and expressing as books and magazines are required of a manufacture of the history book of themselves until it mainly results now from a manufacturer's (him) childhood age.

[0003]

On the other hand, the simple history book of itself of the write-in formula for mitigating the burden of a manuscript creation also exists. It consists of items, such as birth and a schoolchild age, and two or more question matters are established in each item, and this history book of itself completes the history book of itself, when he replies to these question matters.

However, it is common for a question matter to be rough, and it is the work which text-izing a reply himself etc. must carry out to a question matter on the basis of storage of in each age in the manuscript implementor who is him of self, must create, and requires perseverance and time very much, and the content of the history of a person is also will be influenced by the text force. And since the question matter was rough, it was very difficult to be hard to say that his storage is recovered, to reply to all question matters, and to complete the history book of oneself.

[0004]

In view of the actual condition mentioned above, the purpose of this design can perform recovery of storage easily to a question matter for the history book manufacturer of itself, can be answered to a question matter, without needing the text force so much, and aims at offering the possible history book of a person of creating simply the history book of a person of the content which was excellent with it.

EFFECT OF THE INVENTION

[Effect of the Device]

Since the reply card column of the case index beforehand set as the reply card column to the question matter of the questionnaire formula set up beforehand is prepared according to the history book of a person concerning this design as explained above While storage is recoverable with the reply card column of this case index, it is possible to create simply, the history book of a person, i.e., the history book of itself, of self of the content which only replied to the reply card column of a case index, and did not need special text capacity, but was moreover excellent in fixed level.

[0031]

Moreover, since storage by the years can be restored and the person peculiar information according to the stage can be indicated corresponding to the occurrence year corresponding to the situation item card column of society collected in the chronology format according to the history book of a person concerning this design, the clear history information of the person moreover corresponding to the age can be indicated.

MEANS

[Means for Solving the Problem]

It is devised in order that this design may attain the technical problem and the purpose of the conventional technique which were mentioned above. the history book of a person of this design It is the history book of a person which consists of two or more page sheets for the histories of a person spelled one by one by the history book age item of a person. The page sheet for the histories of a person of the aforementioned plurality While the reply block to the question matter of the questionnaire format beforehand set up by the aforementioned age item about the person peculiar information is prepared It is characterized by having the page sheet for the histories of a person with which it comes to prepare the reply card column of the case index the example answer to which the aforementioned reply block was set beforehand in part at least was indicated to be.

[0006]

Thus, since the reply card column of the case index beforehand set as the reply card column to the question matter of the questionnaire formula set up beforehand is prepared, while storage is recoverable with the reply card column of this case index, it is possible to create simply, the history book of a person, i.e., the history book of itself, of self of the content which only replied to the reply card column of a case index, and did not need special text capacity, but was moreover excellent in fixed level.

[0007]

Moreover, the history book of a person of this design is characterized by having the method which the reply card column of the aforementioned case index chooses from two or more example answers. Since it can choose from two or more example answers to a question matter by this, the width of face of a reply spreads and it is enabled to consider as the content which was excellent also from the history specialization of a person.

Furthermore, the history book of a person of this design is characterized by having the mark check card column which the reply card column of the aforementioned case index chooses from two or more example answers by the answer sheet exam.

[0008]

Thus, since what is necessary is just to check a mark check card column from two or more example answers, and to choose by the answer sheet exam by constituting, the reply to a question matter is very easy, and becomes possible [creating the history book of a person simply].

Moreover, the history book of a person of this design is characterized by the reply card column of the aforementioned case index having the example answer of a selection posting formula which serves as the example answer beforehand set up by filling in a blank.

[0009]

Since it becomes an individual example answer while the reply to a question matter becomes very easy and moreover serves as the example answer set up beforehand by this, since what is necessary is just to enter language, a date, etc. in a blank, it is enabled to create the original history book of a person simply. Moreover, the history book of a person of this design is a history book of a person which consists of two

or more page sheets for the histories of a person spelled one by one by the age item. The page sheet for the histories of a person of the aforementioned plurality It has the situation item card column of society collected in the chronology format from which the social situation corresponding to the aforementioned age item became the occurrence year and pair. It is characterized by having the page sheet for the histories of a person which has the blank for a person information publication which indicates the person peculiar information corresponding to the aforementioned situation item of society.

[0010]

Thus, since storage by the years can be restored and the person peculiar information according to the stage can be indicated corresponding to the occurrence year corresponding to the situation item card column of society collected in the chronology format, the clear history information of the person moreover corresponding to the age can be indicated.

Furthermore, the history book of a person of this design is characterized by constituting the aforementioned blank for a person information publication so that the aforementioned situation item of society may be chosen and the person peculiar information corresponding to it may be indicated.

[0011]

Since storage by the years can be restored further much more since a person peculiar information can be indicated according to the situation item of society, and the person peculiar information according to the stage can be indicated by this, the clear history information of the person moreover corresponding to the age can be indicated.

Moreover, the history book of a person of this design is characterized by having a specific card column for specifying the situation item of society which carried out [aforementioned] selection.

[0012]

Since it can carry out checking a specific card column etc., it can specify and choose it from two or more situation items of society by this and the person peculiar information according to the stage can be indicated according to this, the clear history information of the person moreover corresponding to the age can be indicated.

Furthermore, the history book of a person of this design is a history book of a person which consists of two or more page sheets for the histories of a person spelled one by one by the age item. The page sheet for the histories of a person of the aforementioned plurality While the reply block to the question matter of the questionnaire format beforehand set up by the aforementioned age item about the person peculiar information is prepared As if it has the page sheet for the histories of a person with which it comes to prepare the reply card column of the case index the example answer to which the aforementioned reply block was set beforehand in part at least was indicated to be, both The page sheet for the histories of a person of the aforementioned plurality It has the situation item card column of society collected in the chronology format from which the social situation corresponding to the aforementioned age item became the occurrence year and pair. It is characterized by having the page sheet for the histories of a person which has the blank for a person information publication which indicates the person peculiar information corresponding to the aforementioned situation item of society.

[0013]

Thus, since it has the characteristic feature of both which were explained above, it is enabled to create simply, the history book of a person, i.e., the history book of itself, of self of the extremely excellent content.

[0014]

[Gestalt of implementation of a design]

Gestalt of operation of the following and this design

[Translation done.]

* NOTICES *

Japan Patent Office is not responsible for any damages caused by the use of this translation.

1. This document has been translated by computer. So the translation may not reflect the original precisely.
2. **** shows the word which can not be translated.
3. In the drawings, any words are not translated.

EXAMPLE

A (example) is explained in detail based on an accompanying drawing.

It is drawing in which drawing's 1 showing the perspective diagram of the history book of a person of this design, and showing [2] one example of the page sheet for the histories of a person of the history book of a person of drawing 1 .

[0015]

In drawing 1 , 10 shows the history book (henceforth "the history book of a person") about a specific person (henceforth an "user"). The history books 10 of a person are two or more page sheets for the histories of a person 12 (henceforth a "page sheet") spelled one by one by the age item. It *****s and the booklet of one volume is constituted.

This page sheet 12 is a "birth - **** age", as shown in drawing 2 .

The age item card column 14 which indicated the age item of each ages, such as "a schoolchild age / friend, and play", is formed in the upper part. Furthermore, according to the age item indicated by this age item card column 14, the question matter card columns 16 and 16 two or more question matters set up beforehand were indicated to be are formed.

[0016]

And the question matter indicated by this question matter card column 16 is the question matter of the questionnaire format set up beforehand, and the reply block 18 to these questions matter is formed in the question matter card column 16 to each question matter.

Specifically in the term of a "birth - **** age", and "a schoolchild age / friend and play", the user will answer in the domain which storage allows about fine questions, such as a birth date, a places of birth, parents' identifier, a family configuration at the time of birth, the weight at the time of birth, and play with a friend.

[0017]

Moreover, according to the question matter indicated by the question matter card column 16, the reply card column 20 of the case index the example answer set up beforehand was indicated to be is formed in a part of these replies block [at least] 18.

There is an example answer which chooses that to which the example answer of a YES/NO format (being no [-]) and two or more alternative 22 are prepared for, and an user corresponds from this alternative as such a reply card column 20.

[0018]

In order to make an user's storage restoration easy here to the question asked for the reply based on clear storage of for example, the user itself, for example, the play with a friend, the sight of an entrance ceremony, the scenery of a school zone, etc., various alternative 22 is prepared and an user chooses the corresponding alternative.

By doing in this way, even if it is a fragmentary information on the far past, it can answer based on the storage restored by such alternative.

[0019]

For example, as shown in drawing 2, as two or more alternative 22, the alternative applicable to an user is chosen about "the play (lady):interior of a room with a friend" in the alternative a "crawling", "****" and "**", a "beanbag", "painting", "doll coral ****", etc.

The example of drawing 2 shows the example two or more alternative 22 was indicated to be as such a reply card column 20. And in order to choose from two or more example answers by the answer sheet exam as a method which chooses such alternative 22, the rectangle-like mark check card column 24 is formed before alternative 22.

[0020]

In this case, since choose the alternative which corresponds from two or more alternative 22, the mark check card column 24 is checked according to the selected alternative 22, it only chooses by the answer sheet exam and a reply is obtained, answering to a question matter becomes very easy, and, as a result, it becomes possible [creating the history book of a person simply].

In addition, of course, it is also possible to surround for example, the example answer itself by the balloon, and to choose it instead of forming the mark check card column 24 in this way.

[0021]

Moreover, drawing 3 shows the example in which the blank 26 was formed as another example of such a reply card column 20. In this example, if the blank 26 is formed in the parenthesis and indicates personal informations, such as language and a date, in this blank 26, it will become one personal information or the text of one sentence. For example, while the mark check card column 24 is checked and an example answer is chosen by the answer sheet exam in the example shown in drawing 3 corresponding to "the house when coming home and the surrounding status" of the question matter card column 16 the example answer beforehand set up by indicating the information of an "elder brother" etc. in a blank 26, and this example -- " -- after coming home, the air raid was suited, and the family (elder brother) was lost It becomes ".

[0022]

Thus, very becomes easy [the reply to a question matter], since a reply can be created only by entering language, a date, etc. in a blank, and moreover, since it becomes the individual example answer according to the individual while it becomes the example answer of the fixed level set up beforehand, it is enabled to create the original history book of a person simply.

Drawing 4 shows another example of the page sheet 12, and only the blank 28 is formed in the question matter card column 16 as a reply block 18 to these questions matter like before with this page sheet 12. That is, the page sheet 12 of a type may be conventionally contained in the history book 10 of a person of this design.

[0023]

Drawing 5 shows another example of the page sheet 12, and serves as the page sheet 12 of the type which combined the page sheet 12 of the example of drawing 2 - view 4 with this page sheet 12.

That is, like the example of drawing 2 in the reply card column 20 corresponding to the question matter card column 16, two or more alternative 22 and mark check card columns 24 are prepared, and like the example of drawing 3, while a blank 26 is formed so that it may become the text of one sentence so that it may become one personal information or the text of one sentence, only the blank 28 is formed like the example of drawing 4.

[0024]

Drawing 6 shows still another example of the page sheet 12, and the situation item card column 30 of society is formed with this page sheet 12 according to the age item card column 14.

The social occurrence 34 which became the occurrence year 32 and this, and the pair is collected into this situation item card column 30 of society in the chronology format. In addition, before this occurrence year 32, the social occurrence specialization card column 36 which specifies the social occurrence 34 with a number, the alphabet, etc. is formed.

[0025]

The typical incident in the age according to the age item as which such a social occurrence 34 was

specified in the age item card column 14, fashion, a person, etc. are mentioned.

And the blank for a person information publication 38 which indicates the person peculiar information corresponding to the situation item of society is formed in the lower part of this situation item card column 30 of society. The specific rectangle-like card column 40 which indicates and specifies a number, the alphabet, etc. as which it is indicated by the social occurrence specialization card column 36 since especially an user chooses what remains in the impression and specifies this selected social occurrence 34 out of the social occurrence 34 indicated by the situation item card column 30 of society is formed in this blank for a person information publication 38.

[0026]

Moreover, according to the social occurrence 34 specified in the specific card column 40, the blank 24 which indicates a personal information is formed in the blank for a person information publication 38 about the social occurrence relevant to each occurrence or age which the user experienced.

In addition, a question which answers the keyword may be prepared like the example mentioned above instead of forming a blank 24 in this case about what has storage about the historical background in each age, for example, an incident and an occurrence, fashion, etc. As such a keyword, a name of a person, an incident name, a vogue word, etc. are mentioned, for example. Although it may face making a keyword answer and an user may be made to fill in a keyword directly, the alternative by the keyword in each age is prepared beforehand, and this alternative may be made to choose.

[0027]

Even if it is the time when it cannot depend on indistinct storage or fragmentary storage by this, by this keyword, without letting scale division pass, an user can restore the storage about a fragmentary social information to huge data which were appended in the former, and can reply to them.

Thus, what is necessary is to choose suitably the various page sheets 12 mentioned above, to spell them, and just to create the history book of a person with the history book of a person of this design.

[0028]

As mentioned above, although the example of this design was explained, this design is not limited to the example mentioned above. For example, although the example of drawing 1 shows the status that a book was bound, of course, you may carry out as [constitute / the booklet of one volume / spell two or more page sheets 12 free / a desorption / in a binder format, and / for example,].

Moreover, of course, it is also possible to create the various page sheets 12, such as to set a social occurrence and an individual age as an user's age collectively beforehand, by combining the example of drawing 2 - view 6 suitably.

[0029]

Furthermore, of course, it is also possible to extract a personal information after this and to manufacture the text-ized formal person capital, using the history book of a person with which the user indicated the personal information in this way as an object for manuscripts.
